Customer Service:

Danmer was founded in 1976. Since then, we've built our reputation around the finest custom shutters in the world coupled with our unparalleled customer service.

Danmer Shutters also come with the most comprehensive warranty in the industry, one that's even transferable to subsequent homeowners.

quality CUSTOM SHUTTERS

DANMER CUSTOM SHUTTER PROCESS

1 *Call Us Toll-Free*

Our helpful staff is available 7 days a week to answer your questions and to schedule a FREE in-home design consultation.

2 *In-Home Design Consultation*

One of our trained shutter experts will bring the Danmer showroom to you. They'll explain the many shutter options available for framing, finishes, colors, materials, hardware, specialty shapes and even stained-glass panel inserts.

3 *Custom Shutter Blueprints*

Every one of Danmer's shutters is precisely made for your windows, so one of our licensed and bonded installers will take exact measurements at your home. To assure you of the highest quality of service, we don't use subcontractors. All

of our installers are employees who have undergone rigorous training before they are ever in the field.

4 *Design & Production*

Our production department carefully scrutinizes the blueprints to verify all designs, styles and dimensions. Your shutters are then hand-crafted to the exact specification of your home. Even with this custom approach, our experienced craftsmen are able to provide one of the fastest turn-around times in the industry.

5 *Guaranteed Installation Date*

The very same Danmer installer who took blueprint measurements at your home will return with your finished shutters within 4 to 6 weeks. He'll perform a professional and thorough installation in your home, while being courteous to you and your family.

For over 30 years, Danmer's motto has been: "We treat every customer like they were our only customer." That's the Danmer Difference. Our professional and courteous customer service agents are available 24 hours a day, 7 days a week to ensure your satisfaction.
