

# THE MCGUIRE GROUP

HEALTH CARE FACILITIES

3/1/2021

To whom it may concern:

As an organization that manages 18 long term care facilities throughout New York and Michigan, The McGuire Group is always looking for new and exciting ways to further our commitment to providing a safe, clean and welcoming environment for all of our residents, staff members and visitors. As the COVID 19 pandemic took hold of our communities the need arose for an immediate and reliable cleaning/disinfecting solution. Lou Lamphear and his team at Cleanstrike provided us with that solution.

The Cleanstrike hypochlorous foggers provided us with a fast and effective means of disinfecting spaces throughout our facilities. The system is not only very effective at killing germs (including COVID 19), but its also very safe and user friendly. Our facilities have seen a massive drop in facility acquired COVID infections since the implementation of the Cleanstrike system.

The ease of use and efficiency of the system allowed us to free up valuable man hours in our maintenance and housekeeping departments. Staff members are no longer tied up with labor intensive disinfection programs. The Cleanstrike system is faster and more effective as killing COVID than manual processes.

---

Our relationship with Lou and his team has proved to be a game changer for us in our battle with COVID 19. Their products are great and their customer service is outstanding. I would strongly recommend the Cleanstrike system to anyone looking for a high quality and reliable disinfection solution.

Sincerely,

Pat McFeely  
Vice President of Facilities Management  
The McGuire Group, Inc.
